Storm Interface is a trading name of Keymat Technology Ltd.

Storm In Stock

We are pleased to announce that Gardiner Security is now a Storm in Stock partner. As part of Gardiner's continuing commitment to customer service they have expanded their stock profile to ensure the fastest delivery of Storm AXS products from their UK distribution centre. "STORM in STOCK partnership status is awarded only to that elite class of suppliers offering world class service and supply from a carefully managed stock profile", explains Storm's European Director of Sales Steve Greenaway. "The STORM in STOCK logo tells our customers that Gardiner Security are working 'hand in hand' with Storm to ensure the highest quality in product, service and supply".

"It demonstrates a determination not just to be the best at what we do" says Glen Davies from Gardiner, "but to constantly set a new definition of what being the best means. Storm AXS products have long been a favourite with professional installers, establishing a well deserved reputation for being Rugged, Reliable and Responsive. This is referred to by Storm engineers as the three 'R's', forming the basis of any new product design brief. Gardiner Security will further enhance that reputation by adding a fourth 'R' for RAPID; as in the most rapid supply of STORM AXS products available in the UK today. Gardiner Security are proud to announce we have STORM in STOCK".
